Company Overview

- Julian Raphasha and Associates Civil Consulting Engineers cc (JRACCE) is a black owned company that focuses on providing consulting services, project management and construction management in infrastructure developments.
- JRACCE has been conceived in the year 1998 when the CEO Mr. M.J Raphasha and other associates took a career in civil engineering. It is with the vision of being TODAY'S LEADERS IN ENGINEERING SOLUTION that the members of JRACCE have successfully completed various projects in South Africa, Mozambique, Tanzania, Swaziland, Ethiopia, Zambia and Nigeria under the auspices of other consulting engineering companies in South Africa.
- Having established a good engineering experience and with the need to take engineering to higher levels, it was concluded that the company that will take a lead in engineering solutions is required, then JRACCE was established in the year 2008.
- JRACCE bring excellent engineering solutions in all fields of civil engineering by providing the most safest and cost-effective designs, excellent project management to ensure on time delivery of various project and high class construction supervision and management to ensure that a well managed, designed project is carried out through to excellent construction practice.
- We embrace the culture of total quality management "value before the price" by giving all our clients value for their money in infrastructure development.

TRANSPORTATION AND ROAD INFRASTRUCTURES

JRACCE provide an excellent transportation engineering practices that include planning and designs you're rural, urban and highway transportation infrastructure

We provide services in not excluding the following transportation infrastructures:

- Arrangement of aerial photography to assist in route planning
- Road condition surveys, studies and investigations
- Feasibility studies
- Detailed Geometric Design
 - Horizontal alignment
 - Vertical alignment
- Pavements Design
- Design of bridges and drainage structures
- Detail drawings and technical specifications
- Contract documentation
- Calculation and scheduling of quantities
- Detailed cost estimates
- Call tenders and tender evaluation

Recommendations to client on tender submissions:

- Contract administration and quality assurance management
- Certification of claims
- Handover certificate
- Provide As-Build drawing at project completion

JRACCE TAKE A LEAD IN MAKING YOUR TRANSPORTATION AND ROAD INFRASTRUCTURE PROJECT A SUCCESS

WATER ENGINEERING

JRACCE provide an excellent water engineering practices. JRACCE has very experienced water engineers, Technologist, technicians and CAD operators who assure our clients their water engineering solutions

- Water distribution systems and networks
- Community water reticulation
- Sewer reticulation
- Reservoirs and water towers
- Dams

STRUCTURAL ENGINEERING, INDUSTRIAL DEVELOPMENT PROJECTS, MINING INFRASTRUCTURE PROJECTS, RESIDENTIAL DEVELOPMENT AND POWER STATIONS INFRASTRUCTURE

JRACCE provide an excellent structural engineering practices that include designs new structures, structural assessments and upgrades existing building. JRACCE brings the experience of material science that covers a wide area of concrete, steel, composite etc. JRACCE has very experienced structural engineers, Technologist, technicians and CAD operators who assure our clients the most safest, economical and of great aesthetical appeal structural design.

We provide services in not excluding the following structures:

- High Rise Buildings for the following purposes
 - Commercial, Offices blocks and Residential
- Special Purpose Buildings
 - Educational, Recreational, Hospital and Health Care
- Shopping Centers
- Hotels and Resort Developments
- Car Parks
- Industrial Buildings and Warehouses
- Bridges Commercial low and high rise buildings
- Steel Structures

JRACCE TAKE A LEAD IN MAKING YOUR WATER AND STRUCTURAL ENGINEERING PROJECT A SUCCESS

BRIDGE STRUCTURES

JRACCE provide an excellent bridge designs solutions for rural roads, highways, pedestrians, pipe and Railways Bridge structure etc. We take pride in using our in-house capabilities with the support of excellent software's to provide our clients with excellent engineering solutions in not excluding the following bridge structures:

- Pipe, Box and skew culverts.
- Rigid frame bridges.
- Tee beam and slab bridge decks.
- Composite bridges.
- Plate girders.
- Box girders
- Balanced Cantilever bridges.
- Steel trussed bridges.
- Pre-stressed Concrete bridges.
- Continuous bridges.
- Curved bridge decks.
- Bridge piers and abutments.
- Bridge bearings.
- Bridge foundation including piles.

BRIDGE DURABILITY

- Durability overview
- Monitoring and testing of structures
- Structural assessment and material, and repair methods
- Inspection, assessment and strengthening.

URBAN AND RURAL DEVELOPMENT

JRACCE provide an excellent service in urban and rural development. We take pride in using our in-house capabilities with the support of excellent software's to provide our clients with excellent engineering solutions in not excluding the following:

- Community water reticulation
- Sewer reticulation
- Reservoirs and water towers
- Institutional and social development
- Housing

GEOTECHNICAL ENGINEERING

JRACCE provide an excellent geotechnical solution for all your deep and shallow foundations. We take pride in using our in-house capabilities with the support of excellent software's to provide our clients with excellent engineering solutions in not excluding the following geotechnical engineering practice:

- Recommendation on soil testing method for specific site condition
- Determining your design and allowable bearing capacities
- Analysis the foundation settlements and their impact
- Recommendation of soil improvement
- Special footing design
- Mat Foundations
- Retaining walls design and stability checks
- Piles design

JRACCE TAKE A LEAD IN MAKING YOUR URBAN - RURAL DEVELOPMENT AND GEOTECHNICAL ENGINEERING PROJECT A SUCCESS

ENVIRONMENTAL MANAGEMENT AND HEALTH AND SAFETY PROJECTS

JRACCE provide an excellent environmental management; we encourage our clients to comply with environmental regulations and recommendations. We have a clear knowledge and understanding of legislative requirements so we can assist with excellent environmental management. We offer the following services:

- Environmental impact assessments.
- Environmental monitoring.
- Environmental audits.
- Environmental risk assessment.
- Borrow pit application and closure with DME.
- Water license application with DWAF
- Waste management.
- Health and Safety plans.

CURRICULUM VITAE OF SHAREHOLDER

Names : Magakantsha Julian
Surname : Raphasha
Profession : Professional Civil Engineering Technologist
Nationality : South African

Education:

University of Surrey (UK)
Msc in Bridge Engineering (Current)
University of Pretoria
BSc(Hons) Applied Science in Structural Technology
E.N Corporate University
Projects Management for Engineers
Tshwane University of Technology
BTech in Structural Engineering
Technikon Northern Gauteng
National Diploma in Civil Engineering
Eagle Computer Training
MS Projects

Membership in Professional Societies:

- American Concrete Institute (ACI)
- South African Institute of Civil Engineering (SAICE)
- Professional Civil Engineering Technologist (201070150) (ECSA)

Career Summary

Julian Raphasha is a Professional Civil Engineer technologist; he spent most of his career with BKS (pty) ltd Bridge Department as bridge Engineer Technologist where he was involved in the design and detailing of several steel and reinforced concrete structures throughout Africa.

Bridge and Structural Engineering

Julian take pride in being part of the design team that successfully completed in not excluding the following projects : Nelson Mandela Bridge in JOHANNESBURG, Gledhow Footbridge - DURBAN, Design and Build of Nangurukuru - Mbwekuru Road at TANZANIA, Runway of Sikhuphe International Airport at SWAZILAND, Azezo - Metema Road upgrading project at ETHIOPA, Mhalthuze Water Buoyant Effluent Disposal scheme pipe line from st2 to ps1- SOUTH AFRICA, Zesco roads upgrade - ZAMBIA, Tamburawa WTW - NIGERIA

Site Supervision

He was then appointed as Senior Engineer Technologist (Resident Engineer) for Eskom at Open Cycle Gas Turbine Mossel bay site where he was involved in the site supervision of the following structures: Gas turbine foundations and buildings, Double storey control building, Dams, Steel structure (Stores, Diesel generator building), Storm water, Access roads and culverts, Cable and pipe trenches, Fuel Tanks and structure, Fuel treatment and forwarding structures, Fire water tanks etc.

Consultant

Julian Raphasha joint BevServ (a coca-cola company) as a consultant where he carryout the design and detailing of steel structures (Warehouses, platforms, etc), Reinforced Concrete structures including office blocks, concrete buildings for mechanical and electrical equipments concrete hardstands etc.
